S61	Sea King	Special Operations
C172	Cessna 172	Training
P28A	Warrior II (PA-28-161)	Training

## How to Connect to VATSIM

**Callsign** – Type your airline call sign, CAX123 where 123 are the numbers assigned to you when you passed your Online Certification Check Ride.

**Real Name** – Your First and Last name

**Server** - IP of the server that you will be logging into

**Port** – 6809

**ID** – Your VATSIM ID (depending on which network you are logging into)

**Password** – Your VATSIM password (depending on which network you are logging into).

**Model** – Type the aircraft ICAO Code that you will be using (see the table above) and make sure that the drop-down menu contains the correct acf.

**Airline** - For California Airlines type “CAX” in the Airline box

**Livery** – The livery of the aircraft that you are flying (see the table above).

-----  
**If you are flying with a Trainer aircraft (C172, P28A) or EZ Rocket (LGEZ)**

**Callsign** – NCXxxx

xxx either being your assigned callsign (from when you passed the online check ride) or three numbers you want. For example my call sign is CAX8825. I would log in as **NCX825**

-----  
**Online Connection Check List**

	1. Run xplane and load your aircraft of choice.
	2. Place your aircraft at your airport of choice.
	3. Position the aircraft anywhere you like in the airport. <b>Mak sure that you are not on any of the runways.</b>
	4. Log into the VATSIM
	5. Enter your “call sign”
	6. Enter your “real name”
	7. Enter port 6809
	8. Enter your VATSIM ID
	9. Enter your VATSIM Password
	10. Enter your aircraft model ICAO code
	11. Enter the name of the VA you are flying under (if none, leave blank and go to step 13)
	12. Enter the aircraft livery that you are using.
	13. Click on “Connect”
